TRACK COVERAGE

Rarely a day goes by without the media reporting on significant security and privacy breaches in private companies and government agencies. The consequences of the breaches can be severe for both the organizations and their affected customers. Increasingly, legal authorities in a variety of jurisdictions are scrutinizing security and privacy practices and proposing tighter regulatory requirements. Key issues at stake include the tensions between gathering, using, storing, safeguarding and disposing of information that has real and perceived value. These tensions are exacerbated inter alia by jurisdiction, technology, use and the user of the information. C-level concern for ensuring the implementation of adequate corporate privacy and security processes and practices is growing as CIOs, CPOs and, indeed, CEOs, try to avoid becoming tomorrow's headline.
